<sup>1</sup> These packages are currently available today throughout the Verizon Online service territory except in California and New Jersey, where we expect to offer them later this year. Verizon Online DSL is not sold in Idaho, Hawaii, Michigan and Ohio.

<sup>2</sup> Connection speeds refer to the rate at which data is transferred between a customer's computer and Verizon's DSL equipment. Actual speeds will vary and often be lower. Throughput, or download, speeds refer to the rate at which data is transferred to a customer's computer from the Internet. Downloads will be lower than connection speeds and also will vary based on numerous factors, including the length of the customer's line from telephone company facilities, condition of phone line and wiring, network and Internet congestion, and server and Web site configurations for sites visited. Due to the technologically sophisticated nature of DSL service, Verizon Online cannot guarantee that the service will be uninterrupted or error-free, nor guarantee service speeds.

<sup>3</sup> Price includes separate Global Service Provider (GSP) fees, where applicable.

<sup>4</sup> Set-up fee waived (\$50-East) or rebated (\$60-West) when purchased with selected Verizon voice service bundles. Sample bundles include such popular voice services as Caller ID, call waiting and voice mail service.
